

## **Title I School Achieves 100% Math Success Despite Odds**

Third-grade students at Twin Lakes Elementary in Hialeah know all about numbers. The Title I school is one of only 28 elementary schools (out of more than 2,000) in the state to achieve 100 percent on the third-grade mathematics portion of the 2010 Florida Comprehensive Assessment Test, according to results released by the Florida Department of Education.

Although Twin Lakes is situated in a low-income area – with 87 percent of its student population receiving free or reduced lunch – students didn't let those statistics stop them from outperforming their peers: Twin Lakes has the unique distinction of being the only non-charter school in Miami-Dade, Broward and Palm Beach counties to accomplish 100 percent on the math portion.

Twin Lakes partnered with Educational Development Associates, Inc. (EDA) more than 10 years ago and the school has seen a consistent boost in performance on standardized tests and other forms of assessments using EDA's Acaletics program. This partnership is proving that gaps in mathematics can be closed – in a fun and challenging way.

Please join EDA in congratulating Twin Lakes Elementary and Principal Maria DeLeon on a job well done.

### **About Acaletics**

Acaletics is a program developed by Educational Development Associates, Inc. (EDA). EDA offers several research-based, results-driven supplemental products and services that boost the performance and achievement of students in schools. Through our innovative Acaletics math program, EDA has helped more than 300,000 students and over 400 schools dramatically improve classroom instruction and learning, test scores, and student competence and confidence by providing invaluable resources and direct support to teachers and school administrators.

For more information on Acaletics, please visit [www.acletics.com](http://www.acletics.com) or contact EDA at 305.362.8887.
